SUMMARY

Information Technology graduate with hands-on experience in Python, SQL, Machine Learning, Data Analysis, and Data Visualization through end-to-end projects. Skilled in building machine learning pipelines, exploratory data analysis, feature engineering, and developing interactive web applications using Flask and Streamlit.

EDUCATION

Datta Meghe College of Engineering, Mumbai University

Graduated: May 2023

Bachelor of Engineering (Information Technology), Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks, Software Engineering, Machine Learning

TECHNICAL SKILLS

Languages: Python, SQL

Data Analysis: Pandas, NumPy, Data Cleaning, Exploratory Data Analysis (EDA), Feature Engineering, Data Visualization

Machine Learning: Regression, Classification, Clustering, Model Evaluation, Hyperparameter Tuning (GridSearchCV)

Visualization: Matplotlib, Seaborn, Power BI

Frameworks & Tools: Flask, Streamlit, Scikit-learn, Git, GitHub, Jupyter Notebook

PROJECTS

Used Car Price Prediction System | Python, Scikit-learn, XGBoost, Streamlit

- Developed an end-to-end machine learning pipeline to predict used car prices using historical vehicle data.
- Performed data preprocessing, feature engineering, categorical encoding, outlier treatment, and model optimization using GridSearchCV.
- Evaluated multiple regression models including Linear Regression, Random Forest, and XGBoost to improve predictive performance.
- Built and deployed an interactive Streamlit application for real-time used car price prediction.
- **Live Demo:** [UsedCarPricePrediction](#)

Customer Segmentation Using K-Means Clustering | Python, Scikit-learn, Streamlit

- Developed a customer segmentation system using K-Means clustering to identify customer groups based on purchasing behavior.
- Conducted exploratory data analysis, feature scaling, and cluster evaluation using the Elbow Method and Silhouette Score.
- Built and deployed an interactive Streamlit dashboard to visualize customer segments and business insights.
- **Live Demo:** [CustomerSegmentation](#)

Student Management System | Python, Flask, SQLite

- Developed a web-based Student Management System for managing student records and academic information.
- Implemented CRUD operations with SQLite database integration and a responsive user interface.
- Structured the application using a modular Flask architecture for maintainability and scalability.
- Deployed the application on Render for online access.
- **Live Demo:** [StudentManagementSystem](#)

CERTIFICATIONS

Data Science Professional Certificate – Coursera

Completed hands-on training in Python, SQL, Data Analysis, Data Visualization, Machine Learning, and Predictive Analytics.

ADDITIONAL PROJECTS

- Medical Insurance Price Prediction — Flask, Scikit-learn, Bootstrap, SQLite
- House Price Prediction — Streamlit, Scikit-learn, XGBoost
- SMS Spam Detection — NLP, Scikit-learn, Streamlit

Complete source code and live demos are available through my GitHub repositories and portfolio website.
